## Professional Summary

Full-Stack Developer skilled in React.js, Node.js, Express.js, and PostgreSQL, with a strong passion for building secure, scalable, and user-centric web applications. Experienced in developing real-world platforms like assignment marketplaces and interactive banking apps, with a focus on clean UI, performance optimization, and secure authentication. Enthusiastic about solving practical problems, collaborating on impactful projects, and continuously refining software architecture and development skills.

## Education

### Integral University

*Bachelor of Technology in Computer Science, 7.9 CGPA*

**Oct. 2023 – Sep. 2027**

*Lucknow, Uttar Pradesh*

### La Martiniere College

*Higher Secondary Education, 8.3 CGPA*

**April 2023**

*Lucknow, Uttar Pradesh*

## Projects

### Writify : University Student Assignment Platform | *React, TypeScript, Node.js, PostgreSQL* | [Live Link](#) **April 2024**

- Developed a secure authentication system with Google OAuth, with session management for 100% verified student logins.
- Designed a responsive, mobile-friendly UI with React and TailwindCSS, featuring dark mode and theme toggling.
- Applied JWT-based authentication and PostgreSQL for secure user data management and session persistence, handling 200+ DB transactions/week.
- Streamlined data pathways for assignment postings, user feedback, and author profiles, cutting down student project completion times by up to 8 hours weekly and fostering greater teamwork between students and writers.

### Jamā'ah Journal: Multi-Faith Prayer & Reflection Tracker | *React, Firebase, TailwindCSS* | [Live Link](#) **August 2025**

- Engineered a scalable web app serving 100+ users for daily tracking of prayers, meditations, or spiritual reflections, supporting multi-faith practices with a dynamic calendar UI and streak analytics.
- Implemented robust privacy controls and a leaderboard system, empowering users to toggle visibility and ensuring fair ranking across all user segments, increasing user engagement by 40%.
- Designed and shipped a fully responsive PWA with offline access, install-to-device, and push-update features, resulting in a 30% boost in mobile user retention.
- Utilised React 18 and Firebase to deliver fast load time, real-time data management for all users, supporting secure authentication and efficient database operations.

## Technical Skills

**Languages:** Python, Java, C/C++, HTML/CSS, JavaScript, SQL

**Developer Tools:** VS Code, Version Control with Git, PostgreSQL, Postman, Deployment & Hosting

**Technologies/Frameworks:** Linux, ReactJS, REST API, GitHub, ExpressJS, Tailwind CSS

**Python Libraries:** Numpy, Pandas, Matplotlib, Seaborn

## Leadership / Extracurricular

### Coordinator, Fiesta

**Feb 2025**

*Integral University Lucknow*

- Managed and coordinated multiple technical events including a Hackathon during the university's annual fest, ensuring smooth execution from planning to completion.
- Boosted event turnout by 30% over the previous year through strategic planning and social media outreach.

### Website Management Team, Annual Fest

**Feb 2025**

*Integral University Lucknow*

- Contributed to the maintenance of the fest website, which allowed students to view event details and register online.
- Assisted with updating event information, testing user flows, and resolving minor technical issues to ensure a smooth registration experience.
- Helped manage fest website handling 300+ student registrations over 3 days.

### Hackathon Participant

**Aug 2024**

*12-Hour Hackathon at IIT Kanpur*

- Collaborated with a team of 4 to design and build a decentralised credential verification system using blockchain technology.
